

## Element 1

# Introduction to Unity

Young people from around the world serve their human family in many ways.

Meet some teachers\* who will share some of their stories. They come representing three language groups and continents. They have visited many classrooms around the world and will share what some of the learners have experienced in their own countries.

You will discover many new ideas of your own as you watch the videos. Listen to the songs and take on the challenges in this learning unit.

When families, classrooms and countries unite, we can help solve problems together and bring greater joy to many people in our human family.
